.Koala protection is critical at the proposed Birkdale white water stadium and precinct. It's being built in a 'Koala Priority Area', on land that is mapped as 'Koala Habitat Restoration' and surrounded by 'Core Koala Habitat'. How will koalas move through their home ranges? Will they be prevented from accessing part of the precinct? Will this increase the distance travelled, exertion, stress, required nutrient intake and likelihood of territorial incidents? .Koala protection is critical at the proposed Birkdale white water stadium and precinct. It's being built in a 'Koala Priority Area', on land that is mapped as 'Koala Habitat Restoration' and surrounded by 'Core Koala Habitat'. How will koalas move through their home ranges? Will they be prevented from accessing part of the precinct? Will this increase the distance travelled, exertion, stress, required nutrient intake and likelihood of territorial incidents? Will they be able to access most of the precinct? How will they be protected from the increased human hazards including traffic, people and dogs (which were depicted in the concept plans). Can it be guaranteed that they won't be able to perish in the bodies of water? Will they be able to access most of the precinct? How will they be protected from the increased human hazards including traffic, people and dogs (which were depicted in the concept plans). Can it be guaranteed that they won't be able to perish in the bodies of water?
