Submitter Comments:

The proposed amendments are an attempt to remove powers of oversight and review and enable unchecked development where it is not in the long-term good of the people of Queensland, and may damage natural environments and ecosystems. Globally, development for Olympics provide limited benefit to communities where they're hosted. In many cases around the world, sites developed for the Olympics sit empty or unmaintained as host cities are unable to provide ongoing maintenance. Such cases would suggest that any development for the Olympics requires MORE strict consideration and oversight rather than less. The people of Queensland have already been shocked by the number of broken promises made by the current Qld government in the short time they've been in power. These amendments are extreme overreach and further erode trust in government.
