### Submitter Comments:

Proposed amendments to legislation are intended to override important checks and balances in current legislation. If voters and ratepayers are objecting to proposed olympic developments in places where they shouldn't be built, its for good reason. For example, build more sporting infrastructure developments in the centre of brisbane? These should be built in parts of the greater Brisbane area where there is huge population increase and little sporting infrastructure, ideally along the railway corridor between Strathpine and Caboolture. In this area there is massive population development.
