Submitter Comments:

This is meant to be a climate change games where we do not add carbon dioxide emissions to the atmosphere. We were meant to be using existing built infrastructure. We do not require our structures to be as flash as other cities. We are only a few million population. Why would you destroy our precious green public areas. They are crucial to a liveable city with enhanced wellbeing for residents and wildlife. I am disgusted with your plans. Go and build a stadium in an industrial precinct or at the dog track or horse track, or at QE2 Stadium or Lang Park or gabba, or near hamilton and the gateway bridge. But actually, we don't need a new stadium. You do know trees take 100 years to grow and there are complex ecological webs involved. Someone with beautiful foresight planted our magnificent figs 100 years ago and i thank them in y head all the time. Build at pinkenba. Or archerfield. But really, we don't need it. The victoria park plan is so wasteful. It is wasteful to not use existing buildings in an efficient way. And what is happening with public space at the gabba?
