Submitter Comments:

Please protect environment instead of destroying. So much habitat taken and very little left or made better for ecosystems. Many many animals have become endangered and extinct in just last 10 years. Climate change through fires, floods and invasive weeds are destroying natural habitats also. People need natural habitats for health and wellbeing, clean air and lower air temperatures. We take these things for granted in Australia generally, but are very real impacts to health causing death in higher populated cities that have already destroyed their nature. Environmental specialists are saying if destruction continues, that nature will collapse by 2080. Our children will be given a destroyed and unhealthy world.
