

Sunshine Coast Waterways Authority Bill 2026

Submission No: 005
Submission By: David Baker
Publication: Making the submission and your name public

Noosa River does not required yet another level of river management based 50km south. Enough hands in the lot already screwing it up. We will take our share of that \$33 mil though and manage it properly.

If you want to push this forward then you need to at least what your plans for the Noosa river are. So far heard nothing. In fact the first any one I know heard of this was today, from Sandy Bolton. And I am a local and use the river several times a week, since 1992. Never heard a word about this.
