As a long time Noosa Resident, rate payer and very active user of the Noosa River it gives me GREAT concern that Noosa Council continues their push for absolute control. The Noosa River is a state asset and should absolutely NOT be under control of a small local government and lobby groups that have far too much influence over Noosa Council.

While these lobby groups (heavily funded by Noosa Council also) actively put pressure on Noosa council to act , the vast majority of residents are caught up in very busy life's working and are simply unaware of these things happening around them.

There is absolutely ZERO need for Noosa Council to push for control and state government should always be the overseeing body. Noosa councils ONLY objective with lobby groups is to create areas that lock out river users such as those boating and fishing and this is simply unacceptable to the majority of residents and holiday makers enjoying what is there to be loved. Not be locked out and unusable.
