---

I have asd level 2, anxiety and depression.i struggle to make ends meet and having the \$0.50 travel makes it easier and affordable to get around and want to go out. Beforehand it was hard and never had enough money for public transport. It helps me to get to work and social things been \$0.50 travel has been better and worth it and enjoying to go out and use the public transport. Would be disappointed and make it hard if this travel went back up they way it was.
