

Transport Affordability Amendment Bill 2026

Submission No: 020

Submission By: [REDACTED]

Publication: Making the submission public but withholding your name

I often see price hikes of 50+ cents within a single day, and a wild disparity between prices from different parts of brisbane. The fact that there is 0 reason behind these price changes other than price gouging and taking advantage of citizens who have no other option is disgusting. The fact that the government, who used to be about representing the common Australian, and protecting the rights, freedoms, and well-being of the people in their local communities have now turned into a collection of for-profit rats selling themselves to the highest corporate bidder over the bodies of their constituents, should bring a deep sense of shame and grief to any politician left with a soul. Bring regulation to corporations taking advantage of us. Tax the big businesses who make billions off of us. Administer meaningful and impactful repercussions to those who actively flaunt regulations and make our lives worse!
