[REDACTED]

Dear Sir/Madam

I am writing to you with regard to my deep concern over the Adani mine. Australia is the driest country in the world and at the moment a large proportion of our country is in the grip of deep drought yet Adani, a foreign owned mining company reknown for corruption and environmental destruction has been given accesss to virtually unlimited supply of our precious water.

Scientists have agreed that global warming should be kept below 1.5 C, yet the QLD and Federal Governments continue to support the construction of a mega coal mine in an environmentally sensitive area adjacent to the Great Barrier Reef. As a concerned grandmother, I support the Mineral Resources Ammenedment Bill 2018, introduced to the QLD Parliament by the Honorable Member for Maiwar, Mr Michael Berkman. I am extremely concerned for the future of my grandchildren and the other children who will be affected by the decisicions made in Parliament today.

It is for the sake of future Australians that Governments, State and Federal need to make the tough decisions and divest from Coal and Gas mines. Throughout Australia, people are extremeley dissillusioned with politiicians who are seen to be not making the right decisions for the future of our nation. Opposition to the Adani coal mine is uniting people from all sides of the political spectrum.

I urge you to support this bill and stop Adani from destroying our precious environment.

Kind regards

Rebecca Stevens.
