

To Committee Secretary

M&J Johnson

State Development, Nat Resources

& Ag Ind Development Committee

Parliament House

George Street

Brisbane Qld 4000

Dear committee secretary,

I am asking you to consider these simple questions

If roughly 250,000-270,000 humans are added to our planet daily, after deaths subtracted -and

150 acres of forest are cleared every minute globally-that's 78 million acres globally a year-and

It takes roughly 20 years growth for a tree to produce enough oxygen for one adult human (give or take depending on foliage cover and hemisphere) -and

Considering 395,000 hectares of vegetation was cleared in 2015-16 in Queensland .

Why are we even conducting this senseless exercise-unless suicide is generally being seriously considered an option for the human species.

I am a farmer and I saw Ag forces propaganda which was sent out ,I must be a farmer as I grow 3 tomato bushes,2 lemon trees ,1 lemonade tree ,6 paw-paw trees (big supplier) and own 5 organic chickens and various herbs .

More importantly, I voted for you to overturn these laws -so just do it.

Regards Farmer Mike and Farmer Jan Johnson
