To whom this may concern,

I'm writing this letter regarding the proposed changes to the tree cleaning guidelines. My family (my wife Susan, 3 boys and parents who are gearing themselves for retirement) live north of Roma but also have country near Wyandra.

The property at Roma has been selectively cleared into a very productive and environmentally conscious enterprise. This has been achieved through my Grandfather and fathers foresight and love for the land.

The property near Wyandra which was purchased by my father and I 15 years ago in which time we invested financially, and a lot of hard work, to improve the production but keeping in mind the environmental impact.

The proposed changes will not only be financial burden but will undo all the environmental friendly work we have done.

With having three sons coming through my wife and I are very pessimistic about a rural future for them if these types of decisions are made. A broad scale blanket rule changes are totally wrong!!!! There are a lot of people doing some very good things on the land and now they feel totally disheartened.

I just hope you realise that you are making a very big mistake!!!

Yours sincerely  
Brad Cameron
