Subject: Land clearing laws
Date: Friday, 16 March 2018 7:53:47 PM

Dear Parliament

It is greatly disturbing that I am forced to comment on proposed draconian laws around land clearing.

I am horrified that land clearing laws will impact on law abiding citizens and the natural conservationists, farmers and graziers but when wholesale clearing of surburbia occurs there are no consequences applied. This must be addressed if you are serious about this short sighted proposal.

The current government is governing for a small narrow minded few who believe the lies and falsehoods about land clearing that are being promulgated.

I invite you to actually come to rural areas and look with fresh unbiased eyes at the improvements land holders make to their land. We are not the vandals that many would have you believe. We value and care for the land and want to be here in the years to come and consequently we plan and manage conservatively and don't clear land indiscriminately.

Please reconsider the clearing laws.
