Hey Giddy Mate,

It is truly shocking , Unbelievable shocking , that we must write with enough passion to just get your attention, and request to have you help save koalas , I find it very disturbing, You have been elected to do the right thing by us all and certainly For the protection of the fauna and flora of this great land we call home, we DO NOT OWN this It is not ours We are 'only ' custodians

Koalas the Australian Icon, evolved in the land thousands of years ago, If You do not care about the well-being of this great Icon , Get out of the post and leave it to someone who will get the job done, We don't need or want the damage, the mega beef farms, its folly! growing crops that are a detriment to this land, a drought country, Like my family , sheep farming for 100 years in Tasmania, we ruined to the land , turned a once fertile ground into dust . It was not meant for sheep farming, Nor is that land meant for cattle grazing , it is folly.

Koalas , Is there any animal like it in the world ? NO! It is their only home , At risk, their lives at risk, This country belongs to them first , They are from here, You and I are Not! , we came here to live here, They eat one type of food! One type of food. One species of tree, One that is, just the one.

Please do what you were elected to do.

What are we meant to do?

sincerely Miriam Stewart -Taylor
