

Mr. John Harth

The Secretary
State Development Natural Resources
and Agricultural Industry Development Committee.

15 March 2018

Dear Sir

I am expressing my concern to the amendments to Vegetation Management Bill introduced to the Queensland Parliament in March 2018.

I feel these amendments will have a detrimental effect on Land Holders Rights. This legislation could only be described as heavy handed. The increase in penalties is unreasonable and the red tape created only adds to a headache for farmers who are trying to manage their land for this generation and the coming generations to make their land more productive.

Most farmers realize if you look after your land, it will look after you.

Yours sincerely

John C. Harth
Farmer
