

SUBMISSION

I provide my submission on rejection of the changes proposed in the Vegetation Management (Reinstatement) and Other Legislation Amendment Bill 2018 ("the Bill").

This constant change in legislation severely impacts on the ability of farm managers to plan and implement effective long-term property and business management decisions. Ecological processes work in much longer timeframes and can be severely compromised when mismatching regulations are enforced. Farmers have long called for certainty with the vegetation management regulatory framework. I am totally opposed to continued uncertainty and attacks on the viability of myself, the long-term sustainability of my business as well as attacks on fellow farmers.

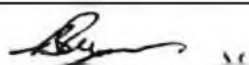

The impacts of the proposed changes to the Vegetation Management Act include;

- The purpose for High Value Agriculture and Irrigated High Value Agriculture will be removed.
- Extends Category B areas (remnant vegetation) and Category C (regrowth vegetation) to freehold land, and indigenous freehold land. Additional 862 000ha High Value Regrowth and water course buffers to all reef catchment, Burnett Mary, Fitzroy, Eastern Cape York.
- Thinning will require Development Application to be lodged for approval.
- The purpose for High Value Agriculture and Irrigated High Value Agriculture will be removed.

Describe the impacts the changes will make to stall agriculture, discourage investment, and increase costs and time to manage vegetation.

- FARMING PRACTICES HAVE CHANGE OVER THE YEARS WE HAVE LEARNED & CHANGED AND NOW YOU ARE SLOWING IT DOWN WITH THE CONSTANT APPROVAL SEEKING FROM GOVERNMENT DEPARTMENT'S.
- DEVALUED LAND & INCREASED LANDED VALUES SO NO-ONE CAN EXPAND TO MEET THE INCREASING NEED FOR FOOD AND FIBRE.
- THE SCIENCE IS UNPROVEN - PHYSICALLY COME AND SEE FOR YOURSELF
- RESTRICTING MY BUILDING DAMS TO WATER STOCK (APPROVAL SEEKING)
- FARMER WORK WITH THE ENVIRONMENT NOT AGAINST IT SO WHEN TIME IS RIGHT
