Committee Secretary
State Development , Natural Resources
and Agricultural Industry Development Committee
Parliament House
George Street
Brisbane Qld 4000

My name is Leanne Moore, I have resided in the area between Charleville Roma Cunnamulla and St George since 1984 after previously living in Brisbane.
Our family has been on this land since 1926, with the many adversities faced this is no small achievement and is to be treated with a degree of respect.

We, as the owners, have carried on the development of Grassmere at enormous expense to produce a meagre income below the touted poverty line, for ourselves, but inflation adjusted since 1984 have earnt for the Australian economy \$29 800 000.00 in wool lamb and beef exports. It is galling to be treated with contempt and as vote catchers after contributing such a turnover of money into the economy. The question is, how does the government intend to replace the financial contribution made by the thousands of workers like us when we give up in disgust and sell to the highest overseas bidder all because a very small amount of ill informed voters think they are doing some good to the environment. They are not, the land and water on our place has benefited by grazing, timber treatment, pasture sowing and stopping erosion....
I am asking you to reconsider the proposed legislation on vegetation management, it has no basis in science or reality.

Your sincerely
Leanne Moore
