To who every reads this :

Please don't make it harder for the grazers and farmers of Queensland to take care of our land.

The selective clearing we do manages the country so there is less erosion, we make it more productive. Properties knocking over in a dry time aren't doing it to make the aspect more pleasing to the eye, they are doing to feed livestock.

Years of experience from 1000 of farmers must be worth listening to over a hand full of greens voters in the city!

Regards

Jenny Bambling
