

## SUBMISSION

I provide my submission on rejection of the changes proposed in the Vegetation Management (Reinstatement) and Other Legislation Amendment Bill 2018 ("the Bill").

This constant change in legislation severely impacts on the ability of farm managers to plan and implement effective long-term property and business management decisions. Ecological processes work in much longer timeframes and can be severely compromised when mismatching regulations are enforced. Farmers have long called for certainty with the vegetation management regulatory framework. I am totally opposed to continued uncertainty and attacks on the viability of myself, the long-term sustainability of my business as well as attacks on fellow farmers.

The impacts of the proposed changes to the Vegetation Management Act include;

- The purpose for High Value Agriculture and Irrigated High Value Agriculture will be removed.
- Extends Category B areas (remnant vegetation) and Category C (regrowth vegetation) to freehold land, and indigenous freehold land. Additional 862 000ha High Value Regrowth and water course buffers to all reef catchment, Burnett Mary, Fitzroy, Eastern Cape York.
- Thinning will require Development Application to be lodged for approval.
- The purpose for High Value Agriculture and Irrigated High Value Agriculture will be removed.

Describe the impacts the changes will make to stall agriculture, discourage investment, and increase costs and time to manage vegetation.
---

It is my aim to manage my country in a enviromentally sustainable and profitable manner, most of the land is brigalow scrub country that has been cleared for many decades and requires continual management to maintain a good ground cover to promote a healthy vegetation balance. Brigalow regenerates every 6 to 8 years and therefor requires constant enviromentally sound management practices. The new laws threaten the viability of my property as the land value will decrease bank support to maintain my current position let alone improve it. I am 32 years old and have recently bought into my parents property and these new laws would affect the viability of my business and my ability to sustain a healthy vegetation balance to the land that i own.
