Dear Committee

Submission to the Inquiry in *Vegetation Management and Other Legislation Amendment Bill 2018*

Thank you for the opportunity to make a submission to the above Inquiry.

I am a member of Pine Rivers Koala Care Association Inc. (PRKCA) and like to assist the PRKCA with my knowledge of natural area management in local habitats for the koala. I also perform voluntary work for Bushcare Australia with habitat rehabilitation in local Moreton Regional nature reserves.

For some time, I have been disgusted at is the constant continuation of development in the Moreton district and continued destruction of natural habitat in the surrounding district and other places by people who try to convince lesser known people that this growth has a beneficial impact for the future economy. When in fact it is having a negative impact on lifestyle: from rising population, rising crime rates, health, and rising prices of everything around us.

Destruction of natural habitat through constant continuation of development is not the reason why I established myself here, out of Brisbane in 2009. Living here is out of the RACE of the city. It has its good feel, its clean air to breathe (friends have told me). It's the clean natural environment with its noticeable diversity of native species of trees and birds.

The Moreton Region is not the only; where our natural biodiversity is continuing to be lost through ignorance and noticeable changes to bioregional sustainability in native environments are occurring.

Large property owners elsewhere are continuously allowed to bulldoze huge numbers of large healthy native trees. *Then they have the nerve to complain that the weather patterns have changed and ask for government taxpayer funds to amend their problems*, such as drought. When improvement to the problems are simple and clear. **Make substantial amendments to law regarding land clearing.**

- Endorse amendments to the Bill to totally remove 'managing thickened vegetation' provisions, to guarantee no new self-assessable code for thinning or new Area Management Plans were possible in the future.
- Propose substantial tightening of fodder harvesting provisions, including major restrictions and tying any clearing to official drought declaration.

Queensland has witnessed a surge in land clearing since laws and policies were seriously weakened by the Newman LNP government. It is now time to ensure our native woodlands, the native wildlife that relies on them for their habitats, and the iconic Great Barrier Reef are afforded much better protection. Over time, the community needs to see reforms leading to land clearing rates falling significantly.

I strongly support the government's intention to substantially strengthen Queensland's land clearing laws. Overall, we note and endorse the Bill in seeking to achieve:

- The removal of high value agriculture as a relevant clearing purpose and the scrapping of that permit process;
- The re-protection of high conservation value regrowing woodlands, under a broader definition that includes ecologically significant woodlands that are 15 or more years old;
- The scrapping of the Thinning 'self-assessable' accepted development clearing code;
- The extension of riparian area protections to the last three Great Barrier Reef catchments;
- The capacity to reclassify Category X into Category A;
- The reinstatement of Riverine Protection Permits; and
- The termination of current Area Management Plans.

While I would prefer see the total removal of provisions for 'managing thickening' and would strongly endorse changes to the Bill in that regard, I recognise that a second-based option is to have the revised processes and tests that would be established under the Bill as a means of delivering a greater level of protection for some native woodlands.

Notwithstanding the above support, I am disappointed that the Bill includes provisions that could be used to allow new self-assessable codes (Clause 4 of the Bill), create new Area Management Plans (Clause 14 of the Bill), delay the removal of existing Area Management Plans for up to two years (Clause 14 of the Bill). And see reverting protected woodlands to unprotected Category X (Clause 13 of the Bill).

I am also disappointed that government is not proposing to substantially tighten up fodder harvesting provisions, including major restrictions and tying any clearing to official drought declaration.

I wish to see the Bill and associated policies strengthened to address each of these deficiencies, and respectfully ask that the Committee examine options for recommending changes to the Bill and codes accordingly.

Finally, I am anxious to ensure that with the passing of the Bill, protected vegetation, be it Category B (remnant), Category C (high value regrowth), or Category R (Reef riparian), is fully and properly mapped and protected across Queensland.

While not a specific focus for this Bill, I look forward to additional specific action under the Planning Act to better protect threatened species habitats in key areas of Queensland, including koalas and their habitats in southern and central parts of the state.

Thank you once again for the opportunity to raise these matters. I would welcome any invitation to appear in front of the Committee or to assist your Inquiry in any other way. Should you require any further information about this submission, please do not hesitate to contact me.

Thank you all for your time.

Yours sincerely,

.....
Ian J. Lambert. BAppSc (PAM), GDST (GIS), Cert. IV (PM).
