Subject: Submission - vegetation Management laws

I am writing in relation to the vegetation Management laws. My father has invested in 3 property to met his children's hopes and dream of raising their children on the land, as we were. The properties currently have 9 employees with the hope of we would be able to employ another 3 staff, once we are more financial. However these laws will cut back our stock numbers as we will not have grass cover we will have tree cover with soil erosion. These laws will give our children no hope of becoming farmers. The property we currently manager will not carry enough stock to support a family.
