Submitter Comments:

I have a large number of grievances about the exploitation of animals, but concur and agree entirely with the proposals set out by Animal Liberation Queensland and the Animal Justice Party Queensland. In particular, I hold that the further breeding of ALL domesticated (including farmed, commodified and companion) species should be ceased immediately. Breeding against biodiversity is inherently unethical and is causing huge amounts of unnecessary suffering and ecological destruction. The animal agriculture industry is a complete travesty and should be abolished.
