**Submitter Comments:**

I have been a wildlife carer since 2004. While I have many concerns, the two issues I'd like to see addressed are the use of 1080 poison, and the use of glue traps. Both methods of animal control are cruel, and involve painful prolonged death, not just of the targeted species, but of many other animals as well. Australia already has the dreadful honour of having the worst species extinction rate in the world. Many other countries have already banned glue traps. We MUST do better.

Please ban 1080. Please ban glue traps.
