Submitter Comments:

A banning of all types and forms of glue traps as they are inhuman and indiscriminate. I have personally witnessed birds, bats, reptiles, small mammals and invertebrates all been trapped on glue traps. All but a few were unable to be saved and died a long agonising death. Glue traps are widely available and easily accessible, this needs to change. They are not checked often and animals are left to die a long and painful death. This is unacceptable and inhumane. I do not support the use or selling of glue traps. This is 2022, it's time to amend animal cruelty laws; a good start would be a banning of all glue traps. I hope this message is received with kindness and compassion. Thank you
