Submitter Comments:

It would appear that the proposed bill hasn't adopted enough of the recommendations suggested by AJP and other animal protection groups in the first round of community consultations. I am calling for greater protections for animals in the Act. I request that the Act be amended to include the following: recognition that animals are sentient establishment an independent office of animal welfare a ban on calf roping and rodeo steer riding a requirement that CCTV in slaughterhouses apply to all facilities and all species of animals slaughtered a stronger penalty for tail docking a ban on spaying of cattle an immediate ban on 1080a ban on the mutilation of farmed animals Stronger persecution of all animal abuse. Thank you.
