Submitter Comments:

I don't need to imagine that glue traps are a cruel and inhumane method of 'pest' control. I have seen the photos of native animals stuck on these glue traps. The issue being that these traps are non specific in their design and there is no way to regulate their use. Isn't that enough? Do I really need to argue beyond what those photos illustrate? Really? I submit that glue traps be made illegal to sell or buy via online or retail options.
