Submitter Comments:

I am strongly recommending that the sale and use of 'Glue Traps' be totally banned. These disgusting items are an inhumane way of capturing and killing ANY creature that gets caught in one. They indiscriminately catch birds, small native animals and reptiles, causing unimaginable suffering as these poor creatures rip themselves apart in an effort to be free. They then die by their injuries or starvation as most glue traps are left unattended and forgotten for weeks on end. Neither is this an acceptable way to treat "nuisance" creatures like mice or cockroaches. Other more humane methods of control are readily available. These horrible items are easily available to the general public and are blatantly misused. Animal Care and Protection must include the welfare and humane treatment of ALL creatures. Glue Traps are one of the cruellest forms of pest control ever invented.
