Re Glue Traps

I am very concerned regarding the cruel and sadistic nature of glue traps, some 10 years ago I purchased a glue trap, taking it to the RSPCA. Obviously nothing has been done to rid the world of this vile device.

All manner of animals are trapped on these insidious glue traps, unable to escape they suffer a dreadful death of dehydration and starvation. Surely Australia and the World should ban these types of cruel devices, also the manufacturer needs to be fined a substantial amount to stop them making any such thing.

I am sickened when shown photos of animals that have been caught on this cruel traps, they must be banned from Australia at least.
