To the Committee

While there is a range of issues in need of attention in addressing animal welfare, I urge in particular, the banning from sale and use of glue traps.

These are cruel and indiscriminate. They trap small birds and mammals, many animals beyond target species.

However, they are also cruel to the target species. There should be no place for them in Australia. Here is an opportunity for Queensland to end this barbaric pest control option.

With hope

Yours sincerely

Margaret Sakrzewski
