Submitter Comments:

Science is now showing how we are all connected. Consciousness is much more than just us humans. It exists in everything including animals. Using things like glue traps is a horrible way to die, and should be banned. It is just the right thing to do. Everything always depends on how you look at things. I see a cute defenseless mouse or rat suffering it is something that hurts my consciousness deep inside. Please take the time to treat our fellow earth creatures with more care.
