I understand the Queensland government is reviewing their current cruelty legislation. I am writing to propose that you ban using glue traps. They are extremely inhumane and an incredibly cruel way for an animal to die. People rarely use them properly and fail to regularly check the glue traps resulting in long, agonizing death for the animals that get stuck. Would you want to die like that: your entire body stuck to a trap where you are unable to move or free yourself, anguishing without any sort of relief? It's absolutely horrible. Please ban these glue traps immediately. Thank you.
