Submitter Comments:

I respectfully urge that glue traps be banned. They are an inhumane and more often trap on intended victim animal, birds, pollinators who suffer a cruel and immensely painful long process of towards death that include starvation dehydration, suffocation. If you could please take these considerations into your decision. These glue traps have been banned in many countries. Please be an ambassador to these beings that fall prey to these glue traps by taking a stand against cruel practices. Thanking you in advance for making the world a better place for all kind, Barbie Marquet
