Submitter Comments:

I am an avid animal lover and I always sign petitions that bring matters of inhumane treatment of animals to the fore. At the moment there is momentum building for the complete banning of glue traps from sale in Australia. These torture devices are very easy to buy (at all Bunnings stores) and other places besides. The general public does not use them correctly, they often fail to check them allowing any poor creature trapped in them to die a long drawn out painful and panicked death. They are hideous and have been banned in many places over seas, it is time we did the same because so often native species are found trapped by these horrific devices. Please ban them NOW. Thank you for your time.
