**Submitter Comments:**

When amending our Animal Protection laws - please remember that animals are Sentient Beings!1. though happy to see proposal of CCTV to be installed in slaughter houses for horses - it surely needs to be installed in ALL slaughter houses!2. an Independent Office of Animal Protection is the only way to have more protection for our animals3a. RSPCA Inspections need more power - investigate, or check, even without reports of cruelty, as per 3b3b. greyhound racing is an example - the abhorrent cruelty of live baiting will continue if not addressed strongly4. our so-called puppy farm 'law' is a disgrace! Victoria and WA are good examples for much better animal welfare for the breeding dogs.5. rodeos can be cruel, but calf roping MUST be banned! there is no excuse for that cruelty6. poison 1080 to be banned7. vets - NOT lay persons to perform pregnancy tests and perform spaying surgery8. all animal farming need stronger welfare laws.
