Submitter Comments:

I wish to add my objection to the continued use (with such easy availability) of glue traps. The ease of purchase by any person from outlets such as Bunnings. The lack of adherence of the how to use instructions on the packaging is criminal. The reality is that these traps are set (outside contrary to instructions) and then they are forgotten. Any non target species that are trapped are left to die a long painful death. This has got to stop - please step up and ban these.
