**Submission to the Queensland Parliament with regard to the review of the current cruelty legislation**

I urge you to ban glue traps, they are inhumane and indiscriminate.

They are currently easily available, and people do not use them properly or check them often, leaving animals to die a long painful death.

What is really needed is a thorough investigation into the treatment of animals and how we care for our wildlife. But meanwhile attention must be brought to the lack of review of impacts on wildlife, particularly with respect to glue traps.
