I write to request that you work to ensure that glue traps are removed from shop shelves, are destroyed in every place where they are found and are banned from ever being used or available to be used by any person anywhere that you have jurisdiction over. These glue traps are a horrendous method of capturing animals leaving those captured to die in a slow, frightening and painful way. In addition they often miss their target and capture animals that were not the intended target because they are indiscriminate. Moreover, those that set them do not attend to them frequently leaving whatever animal that has had the misfortune to come in contact with them, to die slowly, frighteningly and painfully. Please see that these are taken off shop shelves and out of anywhere where they are used and stored by making it illegal to sell, own or use the.
