Submitter Comments:

Dear Committee Members, I have been both shocked and concerned at the disturbing images of defenceless birds and animals cruelly stuck to glue traps! Unable to free themselves they are left to die a slow and agonising death. These traps are poorly designed as they are indiscriminate in what they catch. They are also widely available for use without correct information or supervision. Please take steps to ban them and help protect the smallest and most vulnerable of our precious wildlife. In so doing this may send a message to other states to do likewise and end this cruel practice. Thanking you - Peter.
