Submitter Comments:

Please ban pest glue traps. These traps are an inhumane way to stop pests but most importantly are not limited to the pests they are meant to trap. They are indiscriminate and many wildlife that are not deserving are forced to suffer whilst trapped in these devices. They are too easy to purchase, not requiring any confirmation of knowledge of what they can do to other animals. Australians have our fair share of pests, but there are better ways to deal with them, that do not cause such cruel outcomes to so many other creatures.
