Submitter Comments:

Please ban Glue Traps. They are inhumane and can leave unfortunate birds and animals that come into contact with them to die a very slow and painful death. Trapped... Unable to get free. Slowly dying of thirst and hunger. That is never ok. It is heartbreaking to see all the photos of native wildlife that have been caught in these, and the distress of those people who actually find these dead or dying animals. There are other ways to minimise insects etc and glue traps are not a ethical response. Please join with other countries that have already recognised that glue traps are inhumane and ban them.
