Submitter Comments:

I would recommend that glue traps are discontinued for use in Queensland. They have been banned in countries in the UK and Europe. These glue traps cause incredibly cruel deaths to mammals, insects, in fact all wildlife. Animals can starve to death, or be attacked by predators while stuck to these traps. There are also instances where wildlife have been burnt to death while attached to these traps as they cannot escape. We are struggling with our native species in Australia due to loss of habitat, this will make it worse. It's very upsetting to think of the suffering caused by these traps. Please discontinue their use so that another person doesn't have to make a heartbreaking discovery of an innocent animal being trapped until it dies.
