Submitter Comments:

Please ban glue traps because they are inhumane and indiscriminate. They are presently easily available and people don't use them properly or check them often, leaving animals to die a long painful death. Our wildlife is already under enormous pressure from climate change and its effects, we need to be responsible in our actions to avoid unnecessary (and protracted extremely painful and needless) deaths. Please act with responsibility because we all have been warned that there is no longer any time to waste, we as human beings, must lift our game and maintain diversity.
