Submitter Comments:

Thank you for this opportunity to make a submission to the Animal Care and Protection Amendment Bill. Australia is currently in the top 10 list of countries for endangered animals which is not an enviable position to be in. We have to do better than that. As part of your review I am asking that it include the banning of Glue Traps in Queensland. Many overseas countries have banned Glue Traps and it would be wonderful to get the Animal Care and Protection Bill to include the impacts of animal management processes on wildlife. Glue Traps are indiscriminate inhumane and cruel inflicting indescribable suffering and slow death to native animals, birds and reptiles. They are currently easily available to people who don't know or care how to properly use them so please recommend the banning of Glue Traps.
