**Submitter Comments:**

I recommend the following issues are addressed in this Bill•recognition that animals are sentient•establishment an independent office of animal welfare•a ban on calf roping•a requirement that CCTV in slaughterhouses apply to all facilities and all species of animals slaughtered•a stronger penalty for tail docking•a ban of spaying of cattle•a ban on 1080•a ban on the mutilation of farmed animals•shade and shelter for all farmed animals•adequate food and water for all animals travelling to slaughter houses•a ban on live export for all species of farmed animals
