Submitter Comments:

Australia appears to be one of the worst countries that causes damage to animals, humans should not have the rights to harm and kill animals. The government needs to take responsibility for the damage that is caused due to lack of laws. Stop tail docking, prong collars, firing and blistering, stop using horses and grey hounds for gambling and harming them- all cruel devices need to be banned, there also needs to be bans in place for the amount of fish, prawns, lobsters that are taken from our oceans, soon there will be none left. Australian Government needs to up their game defending animals.
