Submitter Comments:

Glue traps are cruel and should be banned. There are many more humane pest control methods that are fast acting and don't leave creatures maimed and slowly dying in excruciating pain. Disappointingly, glue traps are readily available, which leads to their indiscriminate use. Often times these glue traps are purchased by people who don't use them properly or check them regularly. The act of trying to rescue creatures stuck on a glue trap is very confronting. I have seen tiny limbs torn apart due to the sheer terror and panic of small creatures trying to escape. Reptiles, birds, marsupials and other wildlife are victims of these vile torture traps. Please ban glue traps.
