Submitter Comments:

Glue traps are incredibly cruel and unnecessary: *they are inhumane and indiscriminate* easily available and people don't use them properly or check them often, leaving animals to die a long painful death I used to work in a place where one of the employees said boastfully she had ripped the mouse's legs off - who knows what else people do. After that I threw the rest out. Or otherwise they are left to die a slow and painful death? This is criminal and I cannot believe they are still available. Please ban - people cannot be trusted.
