Submitter Comments:

Much seems to be omitted in the Bill therefore I recommend the following :* that Gluetraps be banned from sale (currently available from Bunnings etc)* that Inspectors be allowed to enter Slaughter Houses without a warrant or permission from the owner/manager, without notice. Also at all farmed animal facilities .* mandatory reporting of animal cruelty be introduced.* The sentience of non-human animals be acknowledged * Meaningful changes to factory farming and other farmed animals welfare so that more humane living conditions & treatment can be enforced.

Including during transportation or slaughter.* Calf roping at rodeos be banned.* CCTV recordings be able to be accessed on request from all farmed animal facilities & slaughterhouses.**
