

Inquiry into the Animal Care and Protection Amendment Bill 2022

Submission No: 871
Submitted by: Ailsa Kuiper
Publication: Make my submission and my name public
Attachments: No attachment

Submitter Comments:

I am making a submission because I believe the current recommendations do not go far enough to protect vulnerable Animals..1. For a start they do not protect all animals in slaughter houses or in transport.2.It does not offer any significant changer for millions of farmed animals across the state.3.. the Bill failed to consider an independent Office of animal Protection.4.It does not introduce mandatory reporting of suspected Animal cruelty.5. It does not ban the use of1080 poison6. It does not acknowledge the sentience of non Human Animals.7. It does not extend the statue of limitation for animal cruelty offences8. It does not make any meaningful changes to factory farmed animal welfare, including transport or slaughter other than horses.9. It does not make any major chances to monitoring and enforcement of animal Welfare. particularly farmed animals.10. The bill does not ban calf roping a cruel sport..I would like to see much more changes made to protect all Animals from suffering and cruelty.
