Submitter Comments:

In regard to the use of glue traps there is no place for these and should not be allowed to be sold for any reason. We should have moved on from using these products when we knew no better in many things that we did or used it the past. The suffering and killing of many of our small animals should not be tolerated and these products should be banned immediately. There should be no profiteering from selling these items at the expense of our fragile wild life. For the sake of the catching and killing some damaging insects, we are killing many more that are beneficial to our agriculture. My family would personally prefer to pay a little more for what we consume than destroy what we need. As a shareholder of Wesfarmers, (Bunnings) we would like you to discontinue stocking these items in the best interest for our environment.
